Secure your copy of **Data Dragon™** and
feel the power of data transformation.

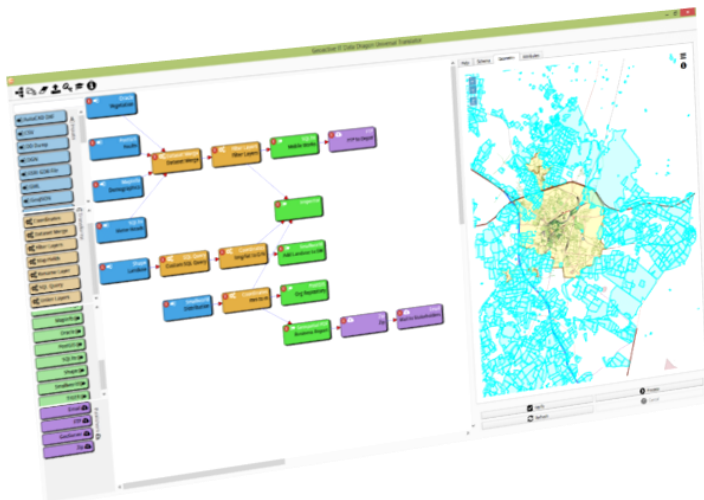

Data Dragon™

U n i v e r s a l D a t a T r a n s l a t o r

An innovative, Australian software platform, taking the complexity out of data merging and translation. Easy to use 'drag and drop' transformations between geospatial data formats, coordinate systems and schemas.

- Unlimited filtering and querying based on user defined criteria
- Dataset merging and field mapping
- Layer and field modification (renaming, addition, removal)
- Geographic and projection library of over 4,000 reference systems
- Ability to define custom reference systems
- Intuitive user interface, simple drag and drop operation
